Termi II Disc

The Files on this disc are saved in 40 Track format on side 1 and 80 Track format on side 2. If you require 80 Track on side 1, please return this disc and ask for an 80 track version. Only advanced users are likely to need this disc.

CONTENTS

SOFT - The soft terminal program. (See manual section 6) This can be loaded and run from BASIC by pressing SHIFT-BREAK.

WS2000 - A Modem control routine for the WS2000 Modem. This routine is activated by entering: *WS2000 when at the main menu and then by ctrl-f7 when online.

S.WS2000 - The source for the above.

D.FLAG - A file of VDU control codes which draw a picture. This file can be sent but please read the text on f5 in section 4 of the manual.

All files in directory "T" are Terminal profiles. These are loaded using the menu option 3.

T.DEFAULT A file of default terminal parameters for use by the "SOFT" terminal program.

T.ADM3A - A file of parameters giving close emulation of the ADM3A

T.GOLD - A file optimised for use with Telecom Gold.

T.PTEST - A file with optimised settings for sending picture files such as D.FLAG
